Ispahani Agro Limited

Ispahani Agro Limited (IAL), a subsidiary of M. M. Ispahani LTD., has been engaged in its agricultural operations through four divisions: 'Ispahani Seeds', 'Ispahani Biotech', 'Ispahani Crop Health', and 'Ispahani Agro Processing' since 2007. IAL represents a comprehensive approach to providing agricultural inputs, ensuring a secure supply of safe food. Against this backdrop, IAL initiated its journey by offering high-quality agro solutions under the guiding principle of "Committed for Developing Safe and Nutrient Enriched Food Secured Bangladesh". For more information, kindly explore <https://ispahaniagro.com>

Vision:

Safe food for a better life

Mission:

Within the framework of 'One-Stop Agriculture', Ispahani Agro Limited is dedicated to furnishing farmers with eco-conscious agro inputs, fostering secure food cultivation. Concurrently, we are committed to extending infrastructural assistance for agro processing and cultivating a sustainable supply chain. Our ultimate aim is to guarantee the seamless delivery of safe and nourishing food to the discerning consumer.

Values:

1. Committed to eco-conscious practices that nurture the land, foster biodiversity, and ensure a thriving agricultural legacy.
2. Dedicated to uplifting farmers through knowledge-sharing, resources, and technology, forging a path to collective prosperity.
3. Unwaveringly uphold the highest standards in purity and ethical conduct, cultivating trust with our stakeholders and delivering superior agricultural products.

IAL Business Wings

'Ispahani Seeds' is actively involved in the exploration, cultivation, refinement and promotion of a diverse array of crop strains. This encompasses cereal crops, oil seeds, tuber crops, and vegetable seeds. The division has successfully established a cutting-edge research and development center, a fully-equipped processing facility and a meticulously controlled warehouse dedicated to maintaining the standards of top-notch quality seeds.

The 'Ispahani Seeds' basket includes:

- | | |
|--------------------|----------------|
| 1. Vegetable seeds | 5. Seed Potato |
| 2. Rice seeds | 6. Jute seeds |
| 3. Wheat seeds | 7. Oil seeds |
| 4. Maize seeds | |

'Ispahani Biotech', guided by its unwavering dedication to preserving the equilibrium of nature, directs its efforts towards advanced research and development in the realm of bio-pesticides and associated technologies. This focus extends to a range of crops, including vegetables, rice, tea, and sugarcane.

Biotech product portfolio of IBT consists of:

- | | |
|-----------------------|--------------------|
| 1. Pheromones | 5. Bio Fungicide |
| 2. Microbial | 6. Bio Viricide |
| 3. Bio control agents | 7. Bio Bactericide |
| 4. Bio Miticide | |

'Ispahani Crop Health' marks the latest addition to the portfolio of Ispahani Agro Limited, aiming to make its mark by introducing, refining and presenting globally acclaimed micronutrients and other essential inputs to the domestic market. Guided by the principle of "Nurturing Healthy Crops for Optimal Yields", this initiative delivers indispensable supplements vital for the robust growth and nourishment of plants. The components of Crop Health currently encompass the following:

- | | |
|----------|--------------------------|
| 1. Zinc | 4. Magnesium Sulphate |
| 2. Boron | 5. Vermi-Compost |
| 3. PGR | 6. Other Micro-Nutrients |

Rice:

In 2010, Ispahani Agro Limited (IAL) made its entry into the rice market with the launch of Chinigura rice. As of now, IAL offers a diverse range of rice varieties, including:

1. Aromatic rice (Chinigura, Kalijira, Tulshimala)
2. Per boiled rice (Minicate, Najirshail, Kataribhog, Banglamoti etc.)

Garden fresh "Mango" (Chemical free mango from garden)

Since its establishment, Ispahani Agro Limited (IAL) has remained dedicated to providing consumers with nourishing and pristine food products. In line with this ongoing commitment, IAL has been consistently delivering garden-fresh mangoes (free from Formalin and Carbide), sourced from carefully selected orchards to the market since 2011.

In addition to its offerings of rice and garden-fresh mangoes, Ispahani Agro Processing is currently planning to embark on a strategic expansion into the following sectors:

1. Processing chemical free vegetable products
2. Edible oil

Our Strength & Opportunities

- Enable independent 'Research & Innovation' for enhancing current 'Seeds & Biotechnology' and cultivating novel varieties.
- Assure seed excellence by implementing ongoing monitoring, led by agricultural experts from IAL.
- Aid in the effective 'Conservation & Preservation' of seeds to ensure their enduring quality.
- Extend advanced 'Post-Harvest' technological aid to farmers.
- Source cutting-edge agricultural technology and bring it right to the farmers' doorstep.

How do we serve the farmers?

- Elevate farmers' productivity by supplying top-tier inputs, such as premium seeds and cutting-edge biotechnology.
- Reduce production expenses for farmers by introducing budget-friendly bio-pesticides.
- Empower farmers through comprehensive training programs to enhance their capabilities.
- Address on-field challenges of farmers by offering expert agro-counseling services.
- Foster connections between farmers and distribution channel partners.
- Drive technological advancements to facilitate adaptation to climate change.
